Section 4 - First Aid Measures

Inhalation: Move to fresh air and provide oxygen if breathing is difficult. Seek medical attention.

Eye Contact: Flush with a gentle but large stream of clean water for 15 minutes, lifting the lower and upper eyelids occasionally. Remove contact lenses if able. Call a physician if irritation persists.

Skin Contact: Clean material from skin with acetone, then wash with soap and water followed by moisturizer. If irritation persists, contact a physician.

Ingestion: DO NOT INDUCE VOMITING. Give large quantities of water. Do not give milk or alcoholic beverages. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get medical attention immediately.

Section 5 - Fire Fighting Measures

Flash Point: 41 C (106 F)
LEL: 1.00 UEL: 7.00

Suitable Extinguishing Media: Dry chemical, CO2, alcohol-resistant foam.

Unsuitable Extinguishing Media: High-volume water jet.

Fire Fighting Procedures: Evacuate area and fight fire from a distance. Cool containers exposed to fire with water. Vapors are heavier than air and may travel along the ground to distant ignition sources. Do not allow runoff from firefighting to enter drains or water sources.

Fire Equipment: Firefighters should wear NIOSH approved self-contained breathing apparatus.

Section 6 - Accidental Release Measures

Spill/Leak Procedures: No health affects expected from the clean-up of the material if contact can be avoided. Ventilate the contaminated area. Prevent the spread of spilled material by using a suitable absorbent material or sand dam.

Section 7 - Handling and Storage

Handling Precautions: Always use good industrial hygiene practices and safety guidelines.

Storage Requirements: Store material in its original container. Keep containers tightly closed when not in use. Keep material away from open flames, sparks, or other sources of heat and ignition.

Special Precautions: Use proper bonding/grounding techniques to avoid static buildup/discharge, which can ignite vapors. Empty containers may contain explosive levels of vapor. Do not cut, drill, or weld on or near the containers.

Ventilation: Provide adequate mechanical ventilation to keep exposure levels below TLV's.

Work/Hygienic Practices: Use only in adequately-ventilated area unless recommended respiratory protection is used. Wash thoroughly with soap and water after handling and before eating, smoking, or using washroom.

Protective Gear: Wear impervious chemical gloves, chemical safety glasses, NIOSH approved organic vapor respirator when exposure levels can not be kept below limits.

Contaminated Gear: If clothes become contaminated, change to clean clothes and wash contaminated clothes before re-use.
