Smith’s CPR Cementitious Polyurethane Resurfacers are 3-component, mortar mix products used to resurface and protect floors susceptible to Thermal Shock as well as water erosion. CPR products works well in constant damp conditions, such as food precessing environments, car washes, etc., and floors with slightly elevated moisture emission levels up to 85% Relative Humidity and up to 10 lbs.

Available in 3 forms:

1) Self Leveler “CPR-SL” – Self leveling slurry designed for medium duty traffic environments
2) Medium Duty “CPR-MD” – Rake and trowel mortar designed for moderate to heavy traffic environments
3) Heavy Duty “CPR-HD” – Trowel grade mortar for heavy castor, forklift and pallet jack traffic environments
