How to Use

1- BV Coatings are ready to use, do not require thinning or filtering.
2- BV Coatings do not require a primer.
3- Surface must be free of mold release, dirt, powder or any other foreign materials (oil, grease, etc.)
4- Agitate container before application.
5- Dry time varies depending on humidity, temperature and airflow. Under ideal conditions (70°F, 50% relative humidity) dry time are as follows:
   - Spray: 15-20 minutes
   - Roller/Brush: 25-35 minutes
For faster dry time, increase airflow.

Packaging

5 gallon pails
55 gallon drums
275 gallon totes

Water Based Coatings for Burial Vault Industry

Est. 1929
Smith Paint Products has worked in conjunction with manufacturers of concrete burial vaults to engineer a water-based protective coating specifically developed for the industry. Utilizing specialized manufacturing techniques, Smith Paints created BV Coatings as environmentally friendly alternatives to hazardous solvent-based paint systems. To achieve desired appearance, Smith Paints manufactures BV Coatings in the following colors:

**Base Color***

- BV-0100 Black

**Metallic Colors***

- BV-M110 Gold
- BV-M120 Copper
- BV-M130 Silver

*Customer and metallic colors are available with predetermined order amount

- **Superior adhesion to concrete.**
- **BV Coatings do not require primer and/or sealer coats.**
- **Cleanup with water.**

**BV Coatings** are manufactured as quick air-dry coating, which can be applied via airbrush, detail gun, production gun, roller and traditional brush. The coatings are water submersible, alkali, weather and ultra violet light resistant after a minimal drying time of 48 hours.

**Highlights**

- Fast Air Dry
- Weather Resistant
- Alkali Resistant
- Ultra Violet Light Resistant
- Gloss or Low Sheen Finish
- Low Odor
- Overnight Deliverable – No Red Label
- Base, Primer or Finish Coat Not Required
- Metallics & Pearls
- Custom Color Matching*

*Available with predetermined order amount
