Application Instructions

POLYASPARTIC – CLEAR OVER WOOD

PDS-PWD-50918

These instructions are not intended to show product recommendations for specific service. They are issued as an aid in determining correct surface preparation, mixing instructions and application procedure. These instructions should be followed closely to obtain the maximum service from the product.

DESCRIPTION:
Smith’s Polyaspartic Clear over Wood System is a fast-return-to-service floor coating system ideal for commercial, retail, institutional and residential flooring applications with mild to moderate traffic environments.

HIGHLIGHTS:
- Overnight return-to-service
- UV Stable – Interior or Exterior use
- Good Stain and Chemical Resistance
- Economical
- Low VOC’s – Available in all regions

POLYASPARTIC – CLEAR OVER WOOD

AREA PREPARATION: Be sure to mask or cover all areas that are not intended to be coated; including, but not limited to; door frames, doors, walls and windows.

NECESSARY TOOLS and EQUIPMENT:
- Plastic Sheeting or Ram Board to cover floor for mix station
- Jiffy mixing paddle
- Low speed ½” drill (Variable Speed 650 rpm or less)
- 5 gallon Plastic Mixing Buckets
- Premium, Non-Shed 3/8” Nap Paint Roller Covers
- 18” wide, non-metallic Paint Roller Frames
- Multiple Extension Poles
- Spiked shoes or Soccer Cleats
- Cleaning Solvent (Oxsol, Acetone, MEK, Xylene)

NOTE: The mix station and all application equipment should be ready for immediate use prior to mixing any product. Higher temperatures and humidity will shorten pot life.

SURFACE PREPARATION: The surface preparation phase of a polyaspartic floor system should be viewed as the most important. Proper floor preparation results in the product’s longevity, minimizes potential failures and creates the best environment for an aesthetically pleasing installation. In short, the more detail and time allotted to this phase of the project will dramatically affect the appearance as well as the durability of the finished floor.

1) Mechanically sand the surface of the wood to remove any imperfections, existing paint, adhesives and loose particulates from the intended application surface
2) Thoroughly vacuum to remove dust and debris

MIXING INSTRUCTIONS: Mix only that amount of product that can be used in 30 minutes (Smith’s Polyaspartic 1000 Series) or 45 minutes (Smith’s Polyaspartic 2000 Series) at 72°F and 40% RH. Higher temperatures and/or high humidity reduce pot life.

Mixing Ratio: Equal parts by volume (i.e. 1 Part A to 1 Part B)

Measure the amounts carefully and mix counter-clockwise for one full minute using a low speed drill with a paint mixing paddle ensuring both the bottom and sides of the mixing container have been thoroughly blended.

DO NOT MIX AT HIGH SPEEDS to avoid air and moisture entrapment.

NOTE: Mechanical agitation is recommended

APPLICATION METHOD: Smith’s Polyaspartic 1000 and 2000 Series may be applied via brush, roller and/or squeegee.

ROLLER APPLICATION: Use a 3/8 inch non-shed chemical resistant roller cover.

BRUSH APPLICATION: Utilize traditional bristle brush application for corners and edges.
Application Instructions

POLYASPARTIC — CLEAR OVER WOOD

These instructions are not intended to show product recommendations for specific service. They are issued as an aid in determining correct surface preparation, mixing instructions and application procedure. These instructions should be followed closely to obtain the maximum service from the product.

INSTALLATION: Cure times based on 72°F – 40% RH
Note: Low temperatures will increase cure times. Higher temperatures and humidity will shorten pot life.

1) PRIMER - Apply a thin coat of Smith’s Polyaspartic Gloss 1000 or 2000 at a rate of 3-4 mils ≈ 300-400 sq.ft. per gallon. Allow to cure:
   - 2000 Slow Cure = 3 - 4 hours
   - 1000 Fast Cure = 1 ½ - 2 hours

2) SANDING - Once Primer is dry to the touch, remove swelled wood grain or other impurities in the primer film via 400 grit sandpaper attached to an orbital, low speed floor sander/buffer.

3) CLEAN - Thoroughly vacuum the entire surface to remove sanding dust and debris

4) TOPCOAT – Apply Smith’s Polyaspartic Gloss Clear 1000 or 2000 at a rate of 5-10 mils ≈ 120 to 250 sq. ft. per gallon. Allow to cure:
   - Light/Foot Traffic:
     - 2000 Slow Cure = 4 - 5 hours
     - 1000 Fast Cure = 2 - 3 hours
   - Heavy/Full Traffic:
     - 2000 Slow Cure = 24 - 36 hours
     - 1000 Fast Cure = 12 - 24 hours

* Milage & sq. ft. coverage are theoretical/approximates. Substrate porosity will affect coverage rates

APPLICATION TEMPERATURES:

</thead>
<tbody>
<tr>
<td>Best</td>
<td>60°-80°F</td>
<td>65°-80°F</td>
<td>65°-85°F</td>
</tr>
<tr>
<td>Minimum</td>
<td>50°F</td>
<td>50°F</td>
<td>50°F</td>
</tr>
<tr>
<td>Maximum</td>
<td>90°F</td>
<td>90°F</td>
<td>95°F</td>
</tr>
</tbody>
</table>

- Do not apply when substrate has direct sun
- High humidity will decrease pot life.
- USE Smith’s Polyaspartic 4000 Series for Low Temperature installations

RECOATING: Smith’s Polyaspartic should be recoated as soon a previous coat is dry to the touch. If recoating after 24 hours has elapsed, degloss existing sealer film with a black janitor pad, 80-100 grit sandpaper or 80 – 120 grit sanding screen.

MAINTENANCE: The coating system must be allowed to cure for no less than one week before using any mechanical cleaning equipment on the surface and no less than 24 hours before neutral cleaner or water exposure. This includes auto-scrubbers, swing buffers, sweepers, etc. Only dust and wet mopping may occur the first week.

Dust mopping, removal of debris and regular cleaning is crucial to maintaining the aesthetics of the coating and obtaining the maximum life span of the floor coating system. Cleaning cannot occur too often and inefficient cleaning will cause the floor to wear out prematurely and possibly stain or discolor depending on what comes in contact with the floor. Spills should be removed quickly. Avoid the use of Polypropylene or abrasive bristle (Tynex®) brushes as these brushes will cause the development of scratch patterns and lessen the sheen.

To maximum your investment with proper floor care and maintenance, remove all particles that may scratch and/or dull the floor coating using the least aggressive method necessary to clean the floor.

It is good practice to develop a floor maintenance schedule to be performed at the end of each shift and a set day per week or month for heavy cleaning:

- Daily = Sweep and dust mop or water only mopping/auto-scrubbing; spot clean spills and oils
- Weekly or Monthly = Scrubbed once per week or month depending on the amount and type of soils present.

Health Department or DEA regulations may necessitate more frequent and stringent cleaning practices as will areas more prone to oils, inks, chemicals, etc. on the floor surface.

Tyxex® is a registered trademark of E. I. du Pont de Nemours and Company.

DETERGENT: Always use the least aggressive detergent necessary to remove the residue. Smith’s Neutral Detergent, or similar, may be used for general purpose cleaning. Use Smith’s Oil Clean, or similar degreaser, for more degreasing and heavy duty weekly or monthly cleaning.
Application Instructions

POLYASPARTIC – CLEAR OVER WOOD

These instructions are not intended to show product recommendations for specific service. They are issued as an aid in determining correct surface preparation, mixing instructions and application procedure. These instructions should be followed closely to obtain the maximum service from the product.

CAUTION:

- Do not drag or drop heavy objects across any floor, including coatings as scratching, gouging or chipping may occur to the substrate or the coating itself.

- Should a gouge, chip or scratch occur, touch-up the damaged areas immediately to avoid chemical or water intrusion to the substrate which could create additional damage. A thin layer of clear nail polish to the damaged area will provide some minimal protection until the area can be properly repaired.

- Material is combustible. Extinguish all flames, pilot lights and electric motors until all vapors are gone and the coating is hard. Keep away from sparks, heat and open flame. Use with adequate ventilation when mixing, applying and curing. Product emits harmful solvent and isocyanate vapors which can cause respiratory irritation. Individuals with chronic lung or breathing problems or negative reaction to isocyanates, should not use this product. The use of a self-contained respiratory equipment (TC 19C NIOSH/MESA) is recommended. Prevent all contact with skin. Use impermeable gloves and chemical resistant eye protection.

SLIP RESISTANCE: Smith Paint Products recommends the use of angular slip-resistant aggregate in all coatings that may be exposed to wet, oily or greasy conditions as well as any condition where increased traction may be necessary. It is the contractor and end users’ responsibility to determine the appropriate traction needs and footwear necessary for the conditions as well as setting performance parameters prior to beginning the application, testing to determine parameters have been met upon completion to achieve the end users documented safety standards.

Mock-ups are highly recommended as part of the evaluation process to determine the appropriate amount of slip-coefficient necessary for the environment.

MOISTURE: It is the contractor’s responsibility to determine whether or not a wooden substrate is sound, solid and suitable.

Wooden substrates shall not have greater than 12% moisture content prior to coating when testing using a wood substrate moisture impedance meter.

Smith Paint Products is not responsible for failures due to the presence of high moisture levels or water damage.

LIMITED LIABILITY: Liability is limited to replacement of defectively manufactured product with same type and cost of the original purchased product upon presentation of a valid, fully paid invoice at the time of a claim. No warranty shall be granted for outstanding invoices or for accounts with unpaid balances until paid in full. No damages, whether consequential, liquidated or other, shall be provided under this Limitation of Liability and Limited Warranty. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SMITH PAINT PRODUCTS, EXPRESSED OR IMPLIED, STATUTORY, BY OPERATION OF LAW, OR OTHERWISE, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SHOULD YOU NOT AGREE WITH ANY OF THE ABOVE TERMS, DO NOT PURCHASE AND USE THIS PRODUCT IF YOU HAVE NOT AGREED TO THE ABOVE TERMS.
